CSBHX v3

Thank you for purchasing the CSBHX 6-way charger. This product should reach you in perfect condition. Should you notice any defects or experience any problems with this product, please contact the dealer you purchased it from immediately.

FEATURES

- The CSBHX charger can be used to recharge Entel's lithium-Ion battery packs.
- Free range power supply facilitates AC voltages in the range 100V to 240V.
- The time required to recharge a fully discharged CNB Series battery pack is approximately 3 hours.
- When charging is complete each CSBHX pod automatically switches to standby.
- This charger has been designed to sit on a flat surface or be wall/ bulkhead mounted for your convenience.

OPERATING INSTRUCTIONS

1. Connect the Entel adapter (CWC6 series) to the CSBHX charger unit.
2. Plug the AC power main plug of the adapter into the wall outlet.
3. If attached to the battery, ensure the radio is switched off.
4. Insert the battery pack into the charging pod, either with or without the radio attached. The charger pod's LED illuminates red to indicate that the battery is charging.
5. When charging is complete the LED will illuminate green.

NOTE

If the LED on a charger pod flashes amber/red this indicates that there is a fault with the battery pack.

Switch off at the mains socket and unplug, then remove the battery from the charger and contact your Entel Dealer.
